UATYQ-BY1

Rooftops R-410A – 25-70 kW: Features

- › Flexible air supply: Since all the units utilize a belt/ pulley driven supply air fan, the units are able to meet a wide range of supply air volumes and external static pressures. Furthermore, the supply air fan motors, pulleys and belts (field supplied) can be easily changed on site to meet exact air flow and ESP requirement if required.
- › Refrigerant is pre-factory charged to ensure **clean and efficient operation**
- › **Electric heater connection**
- › Coil with **anti-corrosion treatment** (gold fin)
- › **Electronic expansion valve** for better control of the refrigerant flow
- › **Cut-off switch** for emergency power cut-off

Control :

- › New **control panel** offered as standard
- › **Extended control length** up to 100m
- › Connectable to **Daikin control systems** (via option)

> **High efficiency**

An EER up to 3,43 thanks to the combination of high efficient and reliable scroll compressors and R-410A refrigerant.

> **Wide operation range**

The UATYQ-BY1 series operate from 52°CDB down to 0°CDB in cooling and from 20°CWB down to -15°CWB in heating.

> **Compact unit**

The flat top design of the unit allows for maximum utilization of warehouse and container space

> **Plug and play installation**

The single unit configuration requires no additional piping work as both the indoor and outdoor sides are pre-connected. Once the ductwork is installed, the only thing left to do is connect the unit

> **Field convertible return and supply air:**

Fan can be mounted in two directions

Daikin's unique position as a manufacturer of air conditioning equipment, compressors and refrigerants has led to its close involvement in environmental issues. For several years Daikin has had the intention to become a leader in the provision of products that have limited impact on the environment. This challenge demands the eco design and development of a wide range of products and an energy management system, resulting in energy conservation and a reduction of waste.
